WHAT IS NATUROPATHY?

Naturopathy is the treatment system of curing the diseases with the help of five elements of nature namely Earth, Water, Fire, Ether, & Air.

Naturopathy is based on the recognition that the body possesses not only a natural ability to resist disease but inherent mechanisms of recovery & self regulation. In practice naturopaths employ only agents upon which life depends & more or less as they are found in nature, such as water, fresh air, clay, natural food, sunlight, exercise etc. modern naturopaths also use methods such as acupressure, magnet therapy, massage therapy, acupuncture, herbalism etc.

The two basic principles of naturopathy are (1) There is one and only cause of disease : the accumulation of toxins in the body (2) It is Nature that heals, not the physician or medicines.

Naturopathy is a philosophy and a set of principles based on sciences that lead an extraordinary level of personal health and happiness.

It recognizes that personal health, environmental health and community health are parts of a whole Naturopathy teaches that the best way to achieve optimum health is right living, developing self-esteem & a positive attitude towards life, eating fresh, whole natural foods, exercising regularly, getting plenty of rest & sleep, getting plenty of fresh air & sunshine, learning to handle stress and avoiding all negative influences of life.

WHY IT PAYS TO BE A NATUROPATH?

Weary of being treated as mere machine, disgusted by various pathological tests & by innumerable medicines they are made to swallow every day, people are now looking for other simple & safer therapies. To all of them naturopathy is best alternative.

The truth is we know that the elements of health are but we have forgotten how to use them & they are free.
